

IT Project Lead | IT Delivery Lead | IT Application Lead

Submitted by **Shahid Hamsa** | www.shahidhamsa.com

Dear Hiring Manager,

I am writing to express my interest in senior IT leadership opportunities — particularly roles such as **IT Project Manager**, **IT Team Lead**, or **IT Assistant Manager**. With over **13 years of experience** in IT Project Management, Software Development, and Business Intelligence, I have consistently delivered enterprise-level initiatives that enhance operational efficiency, enable digital transformation, and create measurable business value.

In my current role at **Massar Solutions PJSC**, I lead cross-functional teams in the design and implementation of scalable .NET applications, Power BI dashboards, and integrated ERP/CRM solutions. Applying Agile Scrum methodologies, I ensure all projects are delivered on time, within budget, and aligned with strategic objectives.

Key Achievements

- Directed and delivered multiple enterprise-scale IT projects, ensuring seamless coordination between business stakeholders, developers, and vendors while maintaining budget and timeline integrity.
- Implemented robust project governance frameworks, improving visibility, accountability, and risk management across concurrent technology initiatives.
- Leveraged data analytics and Power BI to provide leadership with actionable insights that improved forecasting, performance tracking, and strategic decision-making.
- Mentored development and support teams to elevate technical proficiency, adopt Agile best practices, and deliver high-quality, customer-focused solutions.
- Designed and deployed SharePoint portals that automate workflows, enhance cross-department collaboration, and improve overall productivity.

In addition to my technical and leadership experience, I hold certifications in Lean Six Sigma Black Belt, Microsoft Power BI Data Analytics, Agile Scrum, and ISO 9001:2015 Lead Auditing, strengthening my capabilities in project coordination, process optimization, quality management, and stakeholder engagement.

I am confident that my blend of technical expertise, leadership experience, and business-focused delivery approach would allow me to contribute effectively to your organization. I would welcome the opportunity to discuss how my background aligns with your requirements.

Thank you for your time and consideration.

Sincerely,
Shahid Hamsa
